SUMMARY

I am a Web Developer I will describe myself as a Frontend developer in the body of a Backend developer. I am passionate about building new features to help users offload work as much as possible. My favourite framework is Next.js, and I love the entire React ecosystem. I began with frontend development, but my freelance career transformed me into a fullstack developer. My learning journey is ongoing, but I am confident in my skills to solve any problem I encounter.

TECHNICAL SKILLS

Languages: TypeScript, Javascript, SQL, HTML, CSS

Frameworks: Next.js, React.js, React Native, Vite

Serverside Tools: Bun, Node.js, Express.js

Database: Postgres, SQL, MongoDB

Cloud Integrations: Stripe, Paypal, Supabase, Azure OpenAI Service, Digital Ocean

EXPERIENCE

Junior Web Developer

Jan. 2024 – Apr. 2024

DI Solutions - it's a Software Development and Services company

Gujarat, India

- Creating Frontend's for new features
- Integration of authentication and identity management with added cryptographic layer for password protection
- Creating and refactoring APIs as per client's instructions and feedbacks
- Worked on 4 Major projects for cleaning code and refactoring logics

Freelancing

Feb 2023 - Ongoing for multiple clients

Client interactions on Fiverr, Discord and Slack

Gujarat, India

- My major domain is AI applications, I have been on AI train from the very beginning, Integrating custom OpenAI and StableDiffusion models on web is most of the client's requirements.
- Interacting with client on daily basis for exchanging feedbacks and new ideas.
- Providing clients with solutions for their need, Creating dynamic web interfaces for implementing any client ideas on to the web.
- Solving bugs and refactoring code on a daily basis and helping client as much as possible.

PROJECTS

WildfireART | [Project Url](#) | *Next.js, Flask, Supabase, Tailwind, Javascript*

June 2023 – Presently working

- AI Text to image, Image to Image and Inpaint image generations
- Integrated Supabase, web3Auth and Bunny CDN
- Multiple features like Live contests, Active Marketplace, Custom Model training, Tipping with cryptocurrency, Rewarding system for contest and much more.

NEXTBOT | [Project Url](#) | *Next.js, Flask, Supabase, Tailwind, Javascript*

Aug 2023 – Jan 2024

- AI for understanding digital content like PDF, Youtube Videos, Audio and Websites.
- Integrations like Supabase and multiple API to support AI tasks.

Share ENV | [Project Url](#) | *Next.js, React Compiler, Typescript, Crypto Module*

Jun 2024 – Presently Working

- Sharing Secret keys, Uses a complex cryptographic algorithm for Encryption and Decryption.
- Hosted on bare metal server(Personal VPS) with CI, CD and github apps
- I am going to open-source this project soon

EDUCATION

Gandhinagar Institute of Technology

Gandhinagar, India

B-Tech in Computer engineering

2020 - 2024

Devasya International Public School

Ahmedabad, India

HSC and SSC graduation

2010 - 2020
